Dordrecht, November 3<sup>rd</sup>, 2010

Subject: **Tectyl 506 & Tectyl 506-EH**

To whom it may concern,

The chemical compositions of Tectyl 506 and Tectyl 506-EH are similar. Both products are formulated with the same components.

Tectyl 506-EH (Extra Heavy) is formulated with an increased amount of waxy components compared to Tectyl 506, to receive a higher film build, thixotropy.

In addition, as a result Tectyl 506-EH also contains a reduced net amount of solvent.

Best regards,

**Rob van Trier MSc | Technical Brand Manager Tectyl | Valvoline Europe, Middle East & Africa**
